Phone: 928-759-3123

### **Granville streets west of Glassford Hill Road to undergo Micro surfacing.**

VSS International Contracting will apply Microseal to streets in Granville west of Glassford Hill Road beginning on Monday, August 7 and lasting for approximately 14 days, depending on weather.

Work will progress street by street and residents will be notified prior to the work on their street. Please observe the following during the Microseal work on your street:

- Microseal takes three to four hours to dry. If you wish to use your car during this time, please park it on a street not scheduled to be sealed prior to 8 a.m. on the day sealing takes place on your street. **Cars parked within the posted work area will be towed at owner's expense.**
- Once placed, these materials can stain your car, carpets and floors if driven or tracked through before it is dry.
- Please do not wash cars or water lawns on the day work is scheduled.
- Emergency vehicles will have access to all streets at all times.
- Please follow the directions of traffic control workers if you need access to your driveway. Materials will be placed on one side of the road at a time to allow limited access. Please keep in mind that once product is placed on your side of the street, you will not be able to leave your driveway until the street has been opened back up to traffic.
- For their safety, please keep children and animals away from the area while sealing is in progress.
- Scheduled trash pickup will not be impacted.

For questions, please email [questions@slurry.com](mailto:questions@slurry.com). Please include address, phone number and Town location. You may also call VSS at 916-373-1500.
